

## KR630 RAMP STACKER

### An Industrial Stacker at an Affordable Cost!

**Automatically sorts and stacks cards, envelopes, booklets, magazines and more.**

#### **Kirk-Rudy KR630 Ramp Stacker**

Increase your productivity using the KR630 to automatically sort mail in-line with your addressing system

Sorting mail electronically is more accurate than manual sorting and allows for higher processing speeds. Stacks are output according to pre-set counts and post codes breaks established in the mailing list. An in-line divert gate ensures accuracy by removing purged mail pieces. Setup is a snap using the on board PLC and operator interface.

Priced and built right, the KR 630 stacks the odds of success in your favour. See the KR950 for Kirk-Rudy's compensating stacker.

#### **Options:**

- **Runs in-line with most addressing and bindery systems**
