

AMS SIRIUS ENVELOPE SEALING SYSTEM

Improves the efficiency, security and presentation of your mailing process

What Does It Do?

The Swiss built Sirius envelope-sealing system can quickly seal your envelope in one single process. The unique system can seal up to 300 envelopes per minute, that's around 18,000 per hour! Users are even able to adjust the output speed if needed.

Gummed envelopes of various sizes from 90 to 250mm wide can be sealed and as the machine has low noise levels, it is suited to office environments.

Easy To Use

This manual start and stop envelope sealing machine turns on once the envelope enters the machine and turns off when the tray is empty. It automatically adjusts to handle envelopes of different thickness and its rubber conveyor belt with 5 transport rollers allows for the smooth, irreversible flow of envelopes. The water is fed from a large transparent reservoir alleviating calcification build-up. You can see when it needs to be refilled and a self-cleaning moistening roller eliminates the need for maintenance. It seals both pointed and rounded flaps and comes with a variable speed dial, on/off switch, and indicator light.

The envelope sealer is a portable, desktop unit that is clean and quiet for use in any office or department.

Why Do I Need It?

Whether you send out direct mail campaigns, invoices, statements, letters, brochures or other documents, the AMS envelope sealing system reduces the time and effort needed to seal envelopes by eliminating the need to manually wet and fold the envelope flap – perfect for large mailshots.

Key Features:

- Up to 18,000 gummed envelopes can be sealed per hour
- Seals envelopes effectively and quickly from 90mm to 250mm wide
- Large water reservoir
- Adjustable moistening intensity
- Speed regulation provides selectively adjustable output
- Simple to operate
- Great build quality
- Swiss Engineering

ENVELOPE SEALER SPECIFICATIONS

SPECIFICATIONS

Speed:	Maximum tested on C5 envelope is 18,000 per hour
Material Sizes	250mm max width
Material Thickness	From single sheet insert up to 4mm (6mm optional)

TECHNICAL INFORMATION

Machine Dimensions	(W)380mm x (L)1170mm x (H) 400mm
Weight	25.3kg
Electrical	230vAC 50/60Hz - Fuse rating 1.6 Amp

OPTIONAL EXTRAS

Optional Equipment

AMS manufacture a range of machine cabinets that will easily support your mailing equipment as well as provide ample storage space. AMS also manufacturer a range of conveyor stackers and dryers to complement your equipment thereby making it easier and more efficient to produce your mailings.

Mailing Supplies

AMS supply a wide range of low-cost consumables to suit our mailing equipment.

Why Choose An AMS Envelope Sealer?

AMS is one of the UK's leading suppliers of mailroom equipment. As well as having a dedicated team of knowledgeable experts to offer advice and bespoke solutions to suit your mailing needs, we have a well-trained customer support team and highly skilled team of field engineers to support you after your purchase.

This reliable and efficient after-care support service is provided to ensure you get the most out of your purchase. We also offer a comprehensive range of technical support and service packages that cover both equipment and software. Our maintenance packages are an economical way to maximise performance and the longevity of your machine, overall resulting in peace of mind.
